

## **Race Rules**

- Boats must be made from recycled material. Adhesives like duct tape and hot glue are allowed, if the boat isn't fully constructed with them.
- Boat width must not exceed 4.5 inches. This allows the boat to smoothly travel along the track.
- Boats are not allowed if there are any sharp or pointed objects on the hull, or any where that might damage the inflatable track.
- Scouts can right a boat that has tipped over.
- Scouts will use a straw to blow air on the sail to propel the boat down the track.
- Scouts may not push the boat forward by hand or straw.

## **Recycle Regatta Materials**

**Hulls:** juice boxes, cartons: milk, chicken stock, 8-ounce water bottles, 20-ounce soda bottles, Capri Sun pouches, Popsicle sticks (to create a raft design)

**Masts:** straws, skewers, small dowels, pencils, chop sticks

**Sails:** construction paper, index cards, cut-up cereal boxes, small chip bags, Capri Sun pouches

**Avoid:** newsprint and other materials that can get waterlogged, and thick pieces of foam, which stick to the gutters and make a mess when broken.
